PROJECTS

E-Commerce App :

github.com/bigyanlamsal/e_shop

Developed e-commerce application using flutter and firebase where admin can upload and delete the products, can read the customers details for online delivery and customers can order the products as provided by the admin or supplier.

Student Management System :

github.com/bigyanlamsal/Student-Management-

Developed Student Management System website as a part of college project where the website administrator can create, read, update and delete student details. This project was created using PHP, MySQL with XAMPP.

Personal Portfolio-Website :

github.com/bigyanlamsal/Portfolio-website

Developed Portfolio-Website to wrap up the skills I gained as an IT student. I have included my team members and listed my projects here.
